Build the Bars

Help the rhythm train travel in equal groups of beats.

Name: _____ Date: _____

Your toolkit

Quarter note/rest = 1 beat. Half note/rest = 2. Whole note = 4.

Example: 3/4 means 3 quarter-note beats in each bar.

Each group totals 3. Draw bar lines between the groups.

Your turn: add every missing bar line.

1.

2.

3.

Check: count each bar again. Does it match the top number?

No extra beat for a rest: silence still takes time.
